

### Monolithic table

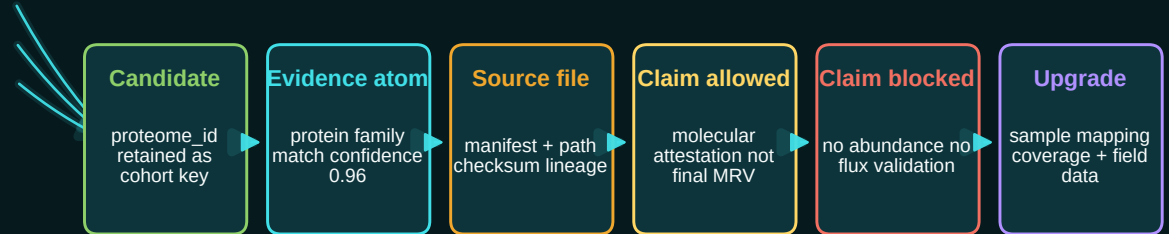

Ranks candidates, but hides the why.

|    |                |      |
|----|----------------|------|
| #1 | rumen...bin.23 | 0.97 |
| #2 | mucc...5465.1  | 0.94 |
| #3 | wetland...041  | 0.91 |

**Prioritization only**

### Attestation graph

Auditable chain of molecular evidence

A monolithic table can rank candidates; the graph explains why a candidate matters, what evidence supports it, which file produced that evidence, what claim is allowed, what claim is blocked, and what validation would upgrade it.

#### Claim boundary

Molecular attestation and MRV feature readiness; not final flux, risk tier, or credit approval.
